

IMPORTANT NOTES

Important Notes

WEEP HOLES

Weep holes allow rainwater to “weep” to the exterior of your home. It is important to keep weep holes clean. Using a small brush or wire to clear these holes of leaves and debris is all that may be required. After a heavy rain, it is not unusual for some water to remain in sill tracks to evaporate later.

Weep holes in Republic’s windows are also filled with small baffle sponges that keep out bugs and dirt. If you remove baffles during cleaning, make sure to replace them.

VENT LATCH OPERATION

Vent latches or "night latches" snap out with the touch of a finger and let in the evening breeze. To pop out latch, simply pull down on the grooved button, push in gently to replace.

Operation of a vent latch

PATIO DOORS

Republic Patio Doors feature a deluxe tandem roller system and aluminum armor sill. Periodically clean the sill to keep it free from dirt, bugs and debris. Make sure the weep holes are unobstructed. Clean with a simple rag and soapy water.
